

A few major media organizations dominate all forms of media in our country today. This is a serious threat to democracy. Our form of government will function well only if there is an informed electorate that has easy access to competing views and ideologies. It has become increasingly difficult in recent years for citizens to evaluate the claims made by those in authority on the basis of a free market of ideas. Please do not eliminate the few remaining restrictions on ownership of media outlets. Please put into place more stringent rules against owning multiple media outlets and sources to enhance the freedom of Americans.
